

# FRED & PAMELA BUFFETT CANCER CENTER BEAM SIGNING

In 2015, we had numerous events where we collected thousands of signatures on white beams, showing a true representation of how cancer affects us all and why we're creating this world-class cancer center for the state of Nebraska and our patients. The beams have traveled more than **2,000 miles throughout Nebraska** collecting signatures from communities such as:

- Chadron
- Alliance
- Hyannis
- Mullen
- North Platte
- West Point
- Norfolk
- Winnebago
- Wayne
- And many others.

We also gathered signatures at the Ambassador for Hope Gala, Cattlemen's Ball and the Science Festival as well as from UNMC and Nebraska Medicine employees at the main campus, Bellevue Medical Center and Village Pointe locations.
